

Frontend Developer

We're looking for Frontend Developers (1-3 years experience) for our development team who will take responsibility at design & development and planning of our products. The applicants will be expected to work at development stages ranging from wireframe design, implementation and testing on a wide range of projects&products.

Candidates should have a solid understanding on the following:

- Familiarity with Python and Django
- CSS, HTML5, Javascript, Bootstrap
- UI / UX concepts
- Unit Testing & Test Driven Development
- Unix / Linux operating systems
- Git and best practices

Any of the following items are a big plus:

- AngularJs, NodeJs, CoffeeScript, Bower
- Restful web services and web frameworks like Django, Spring MVC or similar

Non-technical skills and expertise that we look for:

- Relevant Bachelor degree from a reputable university
- Fluency in English
- No military service obligation for male candidates
- Can work independently as well as good team player

Please apply with:

- Your github account
- Code snippets which represent your coding style
- Brief description of your skills, passions and work style
- Link to your blog or other weekend projects/apps you have built

Job Description:

We are seeking a team member to join our development team as a Frontend Developer. The applicants will be expected to work at development stages ranging from wireframe design, implementation and testing on a wide range of projects&products.
